PROFESSIONAL SUMMARY

Front-End Lead and Senior Full-Stack Engineer with 8+ years across multi-tenant iGaming, enterprise e-commerce and public-sector platforms. Core stack is Vue, Nuxt, React and TypeScript, with Node.js, NestJS and Laravel on the back end. Specialises in themeable white-label architecture that serves multiple consumer brands from a single platform core. Experienced in AI-native delivery with Claude Code, backed by TDD, DDD boundaries and blocking CI gates.

SKILLS

Front-End: Vue, Nuxt, React, Angular, TypeScript, JavaScript, HTML5, CSS3, Tailwind CSS
Back-End: Node.js, NestJS, Laravel, REST APIs, WebSockets, PostgreSQL, MySQL
Architecture: Multi-Tenant Systems, White-Label Platforms, Domain-Driven Design (DDD), Micro-Frontends, Design Systems
Testing: TDD, Vitest, Playwright
DevOps: GitHub Actions, GitLab CI, Cloudflare, Agile
AI Tooling: Claude Code
Working Knowledge: AWS, Docker, GraphQL
Languages: English, French, Arabic

PROFESSIONAL EXPERIENCE

Front-End Tech Lead / Senior Full-Stack Developer

Cactus Gaming

Multi-tenant iGaming engine powering white-label casino brands in licensed markets.

Dubai (On-site)

01/2026 - Present

- Architected and delivered 4 production React white-label platforms from scratch, including data models, routing, Vite builds and CI/CD to Cloudflare through GitHub Actions.
- Own the Vue 3 / Nuxt 3 player front-end, back office and Laravel backend. Runtime theming and tokenized environment variables let new casino brands onboard quickly from a single engine, with tenant data resolved by tenant ID.
- Designed the team's Claude Code engineering workflow (custom skills, plan-first tasks, strict TypeScript, DDD, TDD), with blocking CI gates on type-check, lint, Vitest and Playwright, plus human PR review.
- Sustained 20 to 50 commits per day with roughly 80% of implementation automated.
- Implemented WebSocket streams and defensive state handling for player-balance sync, live-dealer feeds and cashier workflows.
- Rewrote the validation layer across the whole app with Zod runtime schemas and typed service boundaries, preventing contract drift.
- Automated API mocking and pre-flight pipeline checks for release verification across operator brands.
- Tech stack: React, Vue 3, Nuxt 3, TypeScript, Laravel, Playwright, GitHub Actions, Cloudflare

Front-End Developer (Contract)

SQLI Netherlands

Front-end development for Kamera Express, a retail platform operating across multiple European markets.

Remote

10/2024 - 08/2025

- Integrated Algolia faceted search and catalog filtering across a high-SKU inventory, reducing discovery latency.
- Improved Core Web Vitals on checkout and product pages, with double-digit gains in PageSpeed and Lighthouse SEO scores.
- Introduced TypeScript into legacy repositories and standardised Git and CI workflows across squads.
- Tech stack: Vue, Nuxt, TypeScript, Algolia

Front-End Developer (Contract)

Carrefour France

Checkout modernisation on Carrefour's multi-store European e-commerce platform.

Remote

08/2023 - 07/2024

- Re-engineered high-traffic checkout and minicart flows, including localised payment integrations.
- Led the migration of core checkout modules to Vue and TypeScript using DDD and test-first development.
- Worked across three squads to standardise design tokens and maintain contract compatibility with Symfony backend services.
- Tech stack: Vue, TypeScript

Full-Stack Developer

Atos France

Client projects: CouponAI (retail tech) and UGAP (public procurement).

Remote

08/2021 - 07/2023

- CouponAI: developed NestJS microservices and PostgreSQL schemas for coupon generation, POS redemption and analytics, with REST APIs documented in Swagger.
- CouponAI: implemented JWT authentication and RBAC with rate limiting, and built React and Tailwind CSS admin dashboards.
- UGAP: developed Vue 2 and Nuxt packages in a micro-frontend architecture connected to enterprise Java services.
- UGAP: delivered WCAG-compliant catalog and filtering pages on the ARA Design System.
- Tech stack: NestJS, React, Vue, Nuxt, TypeScript, PostgreSQL

Front-End Developer

Gear9 Morocco

Web portals for national telecom operators.

On-site

09/2020 - 08/2021

- Created reusable Vue component libraries for the telecom portals, based on shared design tokens.
- Integrated Elasticsearch for real-time faceted catalog navigation, reducing backend query load.
- Tech stack: Vue, Nuxt, Elasticsearch

Full-Stack Developer

JP&CO Morocco

Real-time fleet telematics and logistics tracking platform.

On-site

10/2018 - 09/2020

- Migrated legacy client applications to component-based single-page applications with Angular and Vue.
- Built Laravel REST APIs for real-time vehicle-telemetry ingestion and geofencing triggers, including access control.
- Tech stack: Angular, Vue, Laravel, MySQL

EDUCATION

Bachelor's Degree in Computer Science

Faculté des Sciences et Techniques (FST), Settat, Morocco

2016
